

FIBREfon[®] Micro 15 & 50

High Performance Non-Itch Sound Absorbing Quilts

Product Information

FIBREfon Micro quilts are made from unique non-itch polyester micro fibres, which provide outstanding sound absorbency, resulting in only half the thickness of quilt being required compared to traditional mineral wool. Ideal for between joists, ceiling cavities & partition voids.

Product Benefits

- Outstanding sound absorbency
- Half the thickness required compared to mineral wool
- Available in two thickness': 15mm and 50mm
- Suitable for ceiling and partition voids
- Robust Detail proprietary components
