

HiDECK® Acoustic Overlay 28

High Density Acoustic Overlay Board for Separating Floors

Product Information

HiDECK Acoustic Overlay 28 flooring treatment's high density and superior compressive strength resilient layer provides outstanding levels of acoustic performance, exceeding legislative requirements. The board has a T&G edge profile to provide easy screw free installation.

Product Benefits

- ⬢ Robust Detail treatment **FFT4** compliant
- ⬢ Suitable for steel/concrete & concrete floors
- ⬢ Feels like screed
- ⬢ Directly accepts all types of floor covering, inc. floor tiles
- ⬢ High compressive strength

Technical Information

		HiDECK Acoustic Overlay 28 High density composite acoustic overlay floorboard
Product description	-	
Thickness	mm	28
Type of facing board	-	Tongue & groove high density gypsum
Resilient layer	-	10mm FIBREfon 10 wood fibre
Board dimensions	mm	600 x 1200
Weight	kg/m ² kg/board	24.10 17.32
Associated flanking strip required	-	YELOfon FS50

CLASS Bfl,S1
BS EN13501-1

Third Party Accreditation and Approvals

Environmental Credentials
