

Residential Case Study

PROJECT BACKGROUND – EAGLE HOUSE, BRACKNELL

Project Background

Eagle House is a leisure development consisting of 84 modern 1 & 2 bedroom apartments at the Lexicon in Bracknell. This 4,500m² redevelopment is part of the Bracknell Regeneration Partnership, costing £240 million to construct this leisure development, including shops, bars, restaurants and leisure facilities.

Cellecta **DECKfon 26T** was used in this development as the ideal acoustic overlay treatment to improve the performance of the original structural timber decked floor. The tongue and groove edge detail make it quicker and easy to install, saving time and money.

Thomas Homes was awarded the contract to redevelop this leisure development within the ring in Bracknell.
