

Residential Case Study

PROJECT BACKGROUND – STRAWBERRY GARDENS, YATTON

Project Background

Strawberry Gardens is a private housing living development in Yatton which offers independent living with access to on-site care for people over the age of 55. This 1,200m² development of timber frame apartments have created 60 apartments and various houses, shops, a post office, pubs and transport links. Situated 10 miles from Bristol airport and around 30 minutes from the centre of Bristol.

Cellecta **HEXATHERM XFLOOR 250** was specified on this project for its high resistance to compression and closed cell structure that provides unrivalled resistance to water absorption, making them ideal for residential applications.

Oakmere Homes was awarded the contract to construct this picturesque village and civil parish within North Somerset.
