

Educational Case Study

PROJECT BACKGROUND – CHICHESTER FREE SCHOOL, HUNSTON

Project Background

Chichester Free School opened in 2013, holding 1,280 students aged 4–19. Located in Chichester, West Sussex, the school was damaged in a fire in 2009; this led to demolition and a part refurbishment of the former Carmelite convent. It includes a 600m² sports hall, a 250m² hall, dedicated music and performance spaces, multi-use games facilities and external landscaping.

Cellecta **YELOfon HD10+** was specified by **Hunters South Architects** for this development for its acclaimed resilient layer, which isolates floating screed from the structural concrete floor. **YELOfon HD10+** has superior impact sound-deadening properties, is lightweight and is easy to handle and install.

This 6,500m² development was awarded to **Farrans** to restore the school at £26.5 million.
