

Residential Case Study

PROJECT BACKGROUND – TIMBER YARD, BIRMINGHAM

Project Background

Timber Yard consists of two residential buildings made up of a collection of 379 modern apartments in Birmingham's Southside district. The East Block features stylish one, two and three bedroom apartments, while the West Block includes a mix of studio, one and two bedroom apartments; both buildings surround a private courtyard garden. This development provides leisure facilities such as a gym, concierge services, a club lounge and screening lounge, and parking. The location is pedestrian friendly, with Birmingham New Street and Birmingham Moor Street walkable within 10 minutes.

Cellecta **HEXATHERM XFLOOR 250** was specified by **Claridge Architects** on this project for its high resistance to compression and closed cell structure that provides unrivalled resistance to water absorption, making them ideal for residential applications.

Galliard Homes and **Apsley House Capital** were awarded this 7,500m² contract to construct this development.
