Residential Case Study

PROJECT BACKGROUND – MYATTS FIELD NORTH, LAMBETH

Project Background

Myatts Field North is a major regeneration project in the London borough of Lambeth, the development consists of 808 new homes, and 172 refurbished properties with 10 per cent fully accessible to wheelchairs. New streets, green spaces, play areas, landscaped park with two seven-a-side football pitches, multi-use games area and a play area, community centre, local store, commercial units, and an energy plant which provides reliable and efficient heating and hot water were also installed.

Cellecta's **ScreedBoard 28** was specified by **PRP Architects** due to its ultimate single layer acoustic overlay treatment. It is frequently reviewed as the solution of choice for new build and refurbishment developments. Its high density and unique resilient layer provides an unrivalled acoustic performance.

Regenter Ltd was awarded this 50,000m² contract to construct this regeneration in South London.
