

## **Residential Case Study**

**PROJECT BACKGROUND – HARBOUR CENTRAL, LIGHTERMAN'S ROAD** 

## **Project Background**

Harbour Central is a condominium complex in London's Docklands, costing £17.6 million and comprising 642 private one, two, and three bedroom apartments divided across five residential buildings. This 30,000m<sup>2</sup> development also provides eight penthouse apartments with a leisure complex, all only minutes from Canary Wharf.

Cellecta YELOfon HD10+ was specified by Rolfe Judd Architecture in this development for is unrivalled acoustic performance when used to isolate a floating screed from a structural concrete floor. This product also works in conjunction with underfloor heating.

Galliard Homes UKS was awarded the contract to construct these luxury private apartments.
