

Commercial Case Study

PROJECT BACKGROUND – SOUTH LAWNS HOTEL,
LYMINGTON

Project Background

South Lawns Hotel is an iconic hotel located on a Green Belt site. An additional 25 bedroom extension was constructed for this development, set on a brick plinth, clad in dark boarding, to emulate agricultural York boarding, with a low-profile aluminium roof. The design and materials proposed minimised its visual impact on views across the Forest landscape nearby and contrasted with the white render of the existing building.

Collecta's **DECKfon Batten 70** was specified by **Boyle and Summers** as they have been rigorously tested and are robust detail complaint for steel, concrete and timber separating floor applications. The battens consist of a layer of recycled, low resonance, open cell, flexible polyurethane foam bonded to an FSC/PEFC certified timber batten.

Tuakana was awarded this 1,050m² contract for this development in Milford-on-sea.
