

Education Case Study

PROJECT BACKGROUND – STONEHAM PARK PRIMARY ACADEMY, EASTLEIGH

Project Background

Stoneham Park is a primary academy that can place 315 children aged 4 to 11. Sponsored by the University of Winchester, the academy is set over two floors with 11 classrooms, group working rooms, library, multi-use games area and grassed play areas. All the while, it maintains stunning views of its historic deer park setting. Conceived as a lean, compact and energy efficient two-storey form, the building is modest in scale and future-proofed for expansion to the east.

Cellecta's **ScreedBoard 28** was specified by **Hampshire County Council** due to its unrivalled acoustic performance, typically 5dB better than legislative requirements. The interlocking edges on our **ScreedBoard 28** makes it easy to install.

Morgan Sindall Construction was awarded this 600m² contract to construct this development within the Hampshire area.
