

# Commercial Case Study

## PROJECT BACKGROUND – STUDLEY CASTLE, HARDWICK LANE

### Project Background

Studley Castle is an exquisite hotel with over 180 years of history in the heart of rural Warwickshire. Built in 1834 in the Gothic Revival style, this project aimed to maintain a modern outlook. A renovation of the castle was carried out, costing £50 million; this 4,200m<sup>2</sup> restoration development is now a luxurious 200-room hotel castle blending the modern with the original ancient facades.

Cellecta **ScreedBoard 28** was specified by **PWP Architects** in this luxury refurbishment to improve upon its existing acoustic properties. It's high density, and unique resilient layer provides unrivalled acoustic performance, typically 5dB better than legislative requirements.

**Rob Gould** was awarded the contract to maintain and convert the iconic castle in Studley.

### Architect

PWP Architects

### Contractor

Rob Gould

### Type of Construction

Commercial

### Project size

4,200m<sup>2</sup>

### Applications

ScreedBoard 28

YELOfon FS50

Pro Adhesive

ScreedBoard Tool Kit
