

Commercial Case Study

PROJECT BACKGROUND – THE BAITUL FUTUH MOSQUE, MOREDON

Project Background

The Baitul Futuh Mosque (the House of Victories) is the largest Mosque complex in Europe with a capacity to accommodate 13,000 worshippers. Funded by members of the Ahmadiyya Muslim Community, reconstruction was completed after a fire in September 2015. The five-floor redevelopment included new administration and assembly buildings with associated facilities and natural ventilation. It also includes multi-purpose halls, offices, and accommodation facilities for guests which include 12 private bedrooms and further dormitories, the associated works include sewer systems, landscaping, cable laying, infrastructure, enabling works, and access roads.

Cellecta's **HiDECK Acoustic Overlay 28** was specified by **John McAslan & Partners** due to its highly conductive structural floorboard with rapid heat transfer characteristics enabling a more efficient under floor heating system. It also directly accepts all types of floor coverings, ensuring each apartment can be finished to the desired look.

Ahmad Construction was awarded this 2,000m² contract to construct this historic redevelopment in South West London.
