

# Commercial Case Study

## PROJECT BACKGROUND – VICTORIA SQUARE, BRAINTREE

### Project Background

Victoria Square is a regeneration scheme that includes 35 new apartment homes, a “Livewell” health hub, pharmacy, Travelodge, bus interchange, café and restaurant overlooking a new public open space, and a twin-level car park. The 70 bed Travelodge will bring visitors and generate new jobs, while the bigger bus interchange will be able to provide services to meet the future needs of Braintree's growing population.

Collecta's **YELOfon HD10+** was specified by **AHR** for this development as the system is lightweight, easy to install, and delivers unrivalled acoustic performance when used to isolate a floating screed from a structural concrete floor.

**Kier Group** was awarded this 400m<sup>2</sup> contract to construct this regeneration scheme.
