

Commercial Case Study

PROJECT BACKGROUND – VILLAGE HOTEL, BRISTOL

Project Background

This Village Hotel is a 4-star hotel and leisure club that opened in December 2018 and is located just north of Bristol in Filton. This hotel has 153 rooms, a licensed pub, restaurant, car park, Starbucks, meeting and events facilities and a gym with a heated swimming pool, steam room and sauna. This hotel is 13.3 miles from Bristol Airport, close to the M4 and M5, and within easy reach of Weston-Super-Mare and Wookey Hole, and close to the UWE Exhibition and Conference Centre. This development has created over 100 permanent jobs within the local community.

Cellecta **HiDECK Acoustic Overlay 28** was specified by **3DReid** for this project due to the floor treatment's high density and superior compressive strength resilient layer; it provides outstanding levels of acoustic performance, exceeding legislative requirements. The board has a tongue and groove edge profile, allowing for screw-free installation.

Willmott Dixon was awarded the contract to construct this 932m² development.
