

Commercial Case Study

PROJECT BACKGROUND – VILLAGE HOTEL, PORTSMOUTH

Project Background

This Village Hotel is a six-storey hotel with over 7,700m² floorspace, car parking and associated landscaping, next to the Porsche Centre at Lakeside North Harbour Portsmouth. The hotel has 153 rooms, conference facilities and a leisure club with a 20m swimming pool, gym and fitness studio, costing £17 million. This hotel has excellent transport links to the city of Portsmouth and the wider Hampshire area via the M27 and the A3.

Cellecta **HiDECK Acoustic Overlay 28** was specified by **3DReid** for this project due to the floor treatment's high density and superior compressive strength resilient layer; it provides outstanding levels of acoustic performance, exceeding legislative requirements. The board has a tongue and groove edge profile, allowing for screw-free installation.

Willmott Dixon was awarded the contract to construct this 900m² development.
