

Residential Case Study

PROJECT BACKGROUND – ELEMENTS, SOUTH NORWOOD HILL

Project Background

Elements is a complex of nine studio 1, 2 and 3 bedroom apartments, which all include either a private garden or Juliet balcony. This highly sought after residence near Crystal Palace offers easy access to the transport hub at Norwood Junction, enabling a 17-minute train ride into London. Grangewood Park's open space is also close by.

Cellecta's **YELOfon HD10+** was specified due to its unrivalled acoustic performance in isolating a floating screed from a structural concrete floor. This product is lightweight, making it easy to install. **YELOfon HD10+** is also delivered in rolls to ensure it's easy to handle. This product is **Robust Detail** compliant through conducting sound testing for Part E underscreed.

Beasons Construction was supplied 500m² of Cellecta products for this development in Croydon.
