

Residential Case Study

PROJECT BACKGROUND – HALING PARK ROAD, CROYDON

Project Background

Haling Park Road is a development consisting of nine self-contained residential units with dedicated parking spaces for each flat. Located only minutes from East Croydon Station, each timber frame unit accommodates four individuals, providing a new beginning for singles and families. The lower ground floor level is screened from the public, providing privacy to its residents, with accommodation throughout the roof space.

Cellecta's **ScreedBoard 28** was specified by **Tone Architecture** due to it being suitable for all floor types and is frequently viewed as the solution of choice for new build and refurbishment developments. Its interlocking edges for installation convenience, high density, and unique resilient layer provides unrivalled acoustic performance.

Signature Living were supplied 500m² of Cellecta products for this development in Croydon.
